

Plaster cum Putty

Aneeb Plaster cum Putty is a water resistant white/Grey cement based putty which provides a strong base on concrete/mortar walls (Internal and External) and ceilings. It is applied before painting of the wall. It fills the fine pores of the walls and ceilings, thereby providing a white, smooth and dry surface for painting. Being water resistant it provides a protective base which prevents expensive paint from flaking. Aneeb Plaster cum Putty has special added polymers and more adhesive strength which provides a strong base ensuring a longer life for the painted surface. It does not require water curing and it can even be applied on freshly plastered wall thus resulting in savings of time and cost. During repainting, the surface done up with Putty requires minimum scrubbing thus eliminating the mess of dust, which is a health hazard especially for asthmatic patients.

Benefits of *Aneeb Plaster cum Putty*

- Being a cementitious material it has better adhesiveness and durability with the concrete walls.
- Doesn't need any kind of primer on it before application of paint/distemper thus saving time & cost.
- Can be applied on both interior and exterior walls & ceilings.
- Gives a smooth, white & glossy finish surface, which effectively reduces the consumption of subsequent Paints & gives true tone of colour.
- It is in dry powder form and does not produce any kind of unpleasant smell at the time of application.

- It is Eco-Friendly. It does not contain lead, oil or toxic material.
- Has anti-carbonation properties thus protects the reinforcement bars from corrosion.
- Does not require any water curing after application thus saving time & cost.
- Is water resistant and can be applied on moist surfaces.
- Accepts any kind of paint or distemper application on it.
- Can be applied on used surface after proper preparation.
- It prevents the growth of algae and fungi on walls.

Wet Density	: 1550 (Min)
Water Ratio	: 0.16-0.18
Setting Time	: Initial 90-120 (Min)
Compressive Strength	: 28 Days 12.0 Mpa
Packaging	: 40 kg

Application standards

For internal walls: 10-12 mm in single coat. For external walls: 10-12 mm base coat & 6-8 mm top coat with a total thickness of 12-15 mm. Maximum aggregate size is around 3 mm.

Technical Specifications

PARAMETERS	SPECIFICATIONS
Appearance	Greyish Granular Powder/White & Multi Colour
Main Binder	Portland Cement
Maximum Aggregate Size	Less than 3 mm
Bulk Density	1.5 - 1.6Kg/Litre unit
Compressive Strength	More than 9 Mpa in 28 days
Flexural Strength	Min 1.8 Mpa in 28 days
Water Retentivity	Min 95% (EN 1015 - 8)
Coverage	18-20 Sq.ft./40 kg Bag (for 10-12mm thickness)
Thickness of layer	Maximum 12mm per coat
Pot life	1.5-2 hours
Proportion of water	17-19% as per weight

Considering the no availability of quality sand, enormous quality difference, minimal wastage Aneeb Plaster Cum Putty (Ready-mix plaster) is widely used now a day's Aneeb Plaster Cum Putty (Ready-mix plaster) is a better and economical choice when compared to conventional plaster.

Features & Benefits

High Strength

Aneeb Plaster Cum Putty (Ready-mix plaster) is graded sand composition provides better bonding, leaves lesser voids and provides high strength to masonry material. This makes it durable and long lasting.

Durable and Crack Resistant

To ensure long lasting durability and zero cracks, Aneeb Plaster Cum Putty (Ready-mix plaster) comes with added polymers and negligible silt content. It sets faster than regular plaster and controls cement shrinkage.

Excellent Water Retention

Polymer additives and graded sand used in Aneeb Plaster Cum Putty (Ready-mix plaster) reduce water absorption making it excellent for regions with higher than average rainfall or ground water levels.

Excellent Coverage

Aneeb Plaster Cum Putty (Ready-mix plaster) provides excellent coverage due to the mineral binders present in it. They not only reduce its density but also provide increased coverage. At a recommended thickness of 12mm, Aneeb Plaster Cum Putty (Ready-mix plaster) covers 18-20 sq. ft per 40 kg bag for 10-12 mm thickness.

Economical

Aneeb Plaster Cum Putty (Ready-mix plaster) is a cost effective, zero maintenance plaster that reduces the overall cost of repair and maintenance over the long term.

Faster Application

Since Aneeb Plaster Cum Putty (Ready-mix plaster) is premixed, application is much faster than conventional products. It is easy to use and reduce rebounding losses.
